

Hiring

Full-Stack Engineer (AI + Cloud Infrastructure)

We are looking for a highly skilled Full-Stack Developer to help us build a scalable, modern web platform powered by AI.

You will be responsible for architecting and implementing both frontend and backend systems, integrating machine learning models, and deploying on cloud infrastructure with best DevOps practices.

Tech Stack

Frontend

- React (Next.js for SSR/SEO)

Backend

- Node.js (NestJS) **or** Python (FastAPI / Django)

AI Layer

- OpenAI API / Hugging Face
- Custom ML models (served via TensorFlow Serving or PyTorch + TorchServe)

Containers & Orchestration

- Docker + Kubernetes (AKS / GKE / EKS)

API Gateway / Proxy

- Nginx or Kong

Database

- PostgreSQL (with Prisma / SQLAlchemy)
- Redis (for caching, queues)

Automation / DevOps

- GitHub Actions or GitLab CI/CD
- Terraform (Infrastructure as Code)

Cloud

- Azure (or AWS / GCP depending on integrations)

Monitoring & Logging

- Prometheus + Grafana + ELK Stack
